

# MOBILE MANIPULATOR

Now that you have selected a smaller and more flexible test head, maximize your test floor flexibility by adding the versatility and reliability of Antares Advanced Test Technologies' easy to use Mobile Manipulator. Designed for compact ATE testers, the Mobile Manipulator™ provides quick, convenient and efficient docking between test heads and automated handlers and probers. You no longer need to move your handlers and probers to your test location. Move your tester wherever you need it!

Mobile Manipulator™

## Mobile Manipulator™ Features and Benefits

- > Convenient mobility ensures efficient use of test room resources
- > Versatile design allows for multiple configurations with automated handlers and probers
- > Supports test heads up to 20 inches square and up to 100 lbs
- > All motions can be independently set and actuated for controlled, precise test head positioning
- > Low maintenance due to lack of counterbalances and pulleys.

Tumble-Lock Mechanism

## Test Interface Solutions

- > Cost-effective and precision-engineered
- > Innovative solutions to unique interface problems
- > Continuous design improvements that enhance tester and handler performance
- > Rapid turnaround of both new designs and re-orders
- > Design and manufacturing center provides total support for global customers
